

SPECIAL EXHIBITIONS

January 21–June 4, 2017

And Still We Rise: Race, Culture and Visual Conversations

The beautifully handcrafted quilts featured in *And Still We Rise* narrate the history of the African American experience, capturing the stories of freedom's heroes, ranging from Frederick Douglass to Mae Jemison to the first African American President. Through the accessibility of their colors, patterns, and symbols, these quilts relate stories that enable conversations about sensitive topics from our history, furthering the conversation of racial reconciliation in America.

Presented by the Women of Color Quilters Network in partnership with Cincinnati Museum Center and National Underground Railroad Freedom Center.

Kalamazoo VALLEY™ Museum

ALWAYS SOMETHING NEW!

January 28 – April 9, 2017

Wizards of Pop: Sabuda and Reinhart

This exhibit focuses on the artwork, from concept and prototypes to the finished product, for various pop-up books produced by paper engineers and artists Robert Sabuda and Matthew Reinhart.

April 15–May 4, 2017

Remembering Marvin Hamlisch: The People's Composer

In partnership with the Kalamazoo Symphony Orchestra, a photographic journey of the life and work of composer Marvin Hamlisch will be on exhibit.

SELF-GUIDED TOURS

Teachers may bring students to self-guide through our permanent and special exhibitions. Museum staff are on hand to assist. There is no general admission and exhibits are always free, but pre-registration for your visit is always recommended.

KALAMAZOO DIRECT TO YOU is our history gallery, filled with many stories, artifacts, and hands-on experiences that will provide you and your students with an immersive experience of Kalamazoo's past and present.

SCIENCE IN MOTION is packed with hands-on fun, where students will learn about energy, the human body, and technology. *Come enjoy these exhibits while they're still here. At the end of the school year, the gallery will close for renovation!*

THE MYSTERY OF THE MUMMY exhibits a 2300-year-old mummy and other Egyptian antiquities. Students will learn that the disciplines of science and history combine to help us understand the culture in which the mummy was created.

NEW!! SCIENCE ON A SPHERE® This exhibit by the National Oceanic and Atmospheric Administration (NOAA) is a global display system that uses computers and video projectors to display environmental data onto a 60-inch diameter sphere, similar to a giant animated globe. Researchers at NOAA developed Science On a Sphere® as an educational tool to help illustrate earth science to people of all ages. Animated images of atmospheric storms, climate change, and ocean temperature can be shown on the sphere, which is used to explain complex environmental processes in a way that is fun and

educational. KVM staff will be able to help teachers choose which data sets their students see, and relate them to other science offerings in the Museum.

FREE DEMONSTRATIONS

Appropriate for all grades, approximately 20 to 40 minutes. Request up to two demonstrations at least two weeks before your visit at no charge. Additional demonstrations are available for fees. Please call for more information and to register.

COOKING A COMET

We'll create a comet right before your eyes! (physics)

ELECTRICITY

Learn the difference between static electricity and current electricity. (earth science, physics)

PHASES OF THE MOON

This interactive demonstration will help students understand sun-moon-earth positions that create the phases of the moon. (earth/space science)

MYSTERY ARTIFACTS

Students will help solve the mysteries of historical artifacts. (inquiry, critical thinking)

SPINNING

See how pioneer women helped to keep their families clothed. Learn about the physics and social history of this simple machine. (science, social studies)

TOYS FROM TIMES PAST

Sample the fun of toys, unplugged! (history, social studies)

PLANETARIUM

Come in out of the cold and check out the latest planetarium projection and sound technology! Let us engage your students in programs about the night sky, our solar system, outer space, and historical and cultural views of the heavens. Visit www.kalamazoomuseum.org for additional shows and detailed content, GLCE alignment, and current astronomical information. Programs are listed with the youngest targeted audience appropriate for the show; many are suitable for older audiences.

PROGRAMS ABOUT THE SOLAR SYSTEM:

Secret of the Cardboard Rocket

Lower-Middle Elementary, 40 minutes

Little Star That Could

Lower-Middle Elementary, 40 minutes

Invaders of Mars

Upper Elementary, 25 minutes

Ice Worlds

Upper Elementary, 25 minutes

New Horizons

Upper Elementary, 25 minutes

Secrets of the Sun

Upper Elementary, 25 Minutes

Wildest Weather in the Solar System

Upper Elementary, 30 minutes

Wonderful Worlds

Upper Elementary, 50 minutes

Small Worlds

Middle Elementary, 25 minutes

PROGRAMS ABOUT THE SUN, EARTH, MOON:

One World, One Sky: Big Bird's Adventure

Preschool - Lower Elementary, 30 minutes

Mystery of the Missing Moon

Middle Elementary, 35 minutes

(Complements the Challenger Learning Center's Moon Mission)

Mystery of the Missing Seasons

Middle Elementary, 40 minutes

Back to the Moon for Good

Upper Elementary, 30 minutes

NEW! Eclipse 2017

Middle Elementary, 40 minutes

PROGRAMS ABOUT OUR PLACE IN SPACE:

Big

Middle Elementary, 40 minutes

Dawn of the Space Age

Middle Elementary, 45 minutes

Hubble Vision

Middle School, 45 minutes

Galaxies

Middle School, 45 minutes

Violent Universe

Middle School and up, 45 minutes

Black Holes: The Other Side of Infinity

Middle School and up, 40 minutes

PROGRAMS ABOUT THE NIGHT SKY:

In My Backyard

Preschool - Lower Elementary, 45 minutes

Bear Tales

Spring constellations

Middle School, 40 minutes

Constellations Tonight

Middle Elementary (live star talk), 50 minutes

Orion Nights

Winter constellations

Upper Elementary, 45 minutes

The Artists' Sky: Art Inspired by the Stars

Spring constellations

Upper Elementary, 45 minutes

Treasures of the Great Lakes

Summer constellations

Upper Elementary, 45 minutes

Cosmic Zoo

Middle Elementary, 55 minutes

Measuring the Night

Upper Elementary, 55 minutes

CULTURALLY-BASED PROGRAMS:

2012 Mayan Prophecies

Upper Elementary, 40 minutes

Lamps of Atlantis

Upper Elementary, 30 or 45 minute versions available

Stars of the Pharaohs

Upper Elementary, 40 minutes

Sky Legends of the Three Fires

All grades, 45 minutes

EARTH & SPACE SCIENCE

Did an Asteroid Really Kill the Dinosaurs?

Upper Elementary, 30 minutes

Dinosaurs at Dusk

Upper Elementary, 45 minutes

JUST FOR FUN:

SpacePark 360

Upper Elementary, 50 minutes

In memory of Alvin H. and Emily T. Little

CHALLENGER LEARNING CENTER

ATTENTION TEACHERS: The CLC is retiring from the Kalamazoo Valley Museum on June 1, 2017. New adventures will be unveiled in October 2017, but don't miss this last opportunity to fly a Mission to Mars or the Moon!

Full-Crew Missions for 4th–8th grades

(Can be adapted for older grades)

Students experience simulated space flight to learn about science, math, technology, critical thinking, problem solving, and teamwork. During their mission, teams of students role-play as mission controllers and astronauts in a realistic spacecraft and mission control environment.

The teams work collaboratively to make decisions, solve problems, and communicate mission results during their 2-hour flight. Students retrieve and interpret scientific data using technology, perform scientific experiments to test hypotheses, conduct research investigations, and document their findings.

The Mission: Voyage to Mars®

Appropriate for 5th – 8th grades.

The Mission: Return to the Moon®

Appropriate for 4th – 5th grades.

The Challenger Experience

(for grades K-3)

This is a 20-minute program designed with younger students in mind. Students participate in problem-solving and teamwork in the exciting environment of the spacecraft simulator. No prior training or preparation required. Classes with more than 20 students will need to schedule two Experience missions.

Junior Missions

90 minutes (for grades 4 & up)

A junior mission is an interactive, hands-on simulated space mission, designed for groups of 15 or fewer, in which participants assume the roles and duties of the astronaut crew. Just like real astronauts, the crew will read and follow directions to successfully complete their mission.

Details for all missions can be found at kalamazoomuseum.org

Educator Workshops for Full-Crew Missions

To ensure a successful program, teachers are required to attend a scenario-specific, one-day workshop prior to their scheduled mission date (not required for Challenger Experience). In addition to hands-on training, educators will receive a notebook containing classroom materials to use with students. If you have not previously attended a teacher workshop, please call the Museum to arrange a time for this training. There is a materials fee of \$30 per teacher.

Please call Kathy Godin at 269.373.7969 for available workshop dates and times.

Please note: Schools that arrive for a mission without a CLC-trained teacher in attendance will forfeit the full-crew experience and be offered mini-missions instead of the usual \$100 late-cancellation fee. Mini-missions last approximately 50-60 minutes, accommodate 15 students maximum, utilize only the spacecraft simulator, and require no Communications Team.

CLASSES & WORKSHOPS FOR STUDENTS

Designed for single classes; full descriptions online. 50 minutes in length. Find details about classes and registration at kalamazoomuseum.org

HISTORY

The Fur Trade (Grades 1-3)

Pioneer Life (Grades 1-4)

PHYSICAL SCIENCE

Weather Instruments (Grades 4-5)

Newton's Laws (Grades 4-6)

HUMAN BODY

Sense-Ability (Grades 4-6)

ASTRONOMY

Meet the Moon (Grades 4-5)

Ancient Observatories Archaeoastronomy Workshop (Grades 4-8)

ARCHAEOLOGY

Archaeology Lab (Grades 5-8)

Site on the Floor (Grades 5-8)

Fees for school programs

Planetarium: All programs, except free demonstrations, are \$3/student or \$45 minimum fee, whichever is greater; one chaperone per 6 students attends free of charge.

Challenger Learning Center:

Full-Crew Missions: \$5/student, minimum number of students required depending upon grade/reading level and mission. Teacher workshop attendance required. Call Kathy Godin at 269.373.7969 for details.

Junior Missions: \$5/student or \$45 minimum fee, whichever is greater.

The Challenger Experience: \$3/student or \$45 minimum fee, whichever is greater.

Classes and Workshops for Students: All classes \$3/student or minimum \$45, whichever is greater.

Demonstrations: Schools can request up to two FREE demonstrations. Additional demonstrations are \$45 each.

Reservations

All group visits to the Museum require at least two weeks' advance notice. Please call the Group Reservation Coordinator, Elizabeth Barker, to arrange your visit: 269.373.7965, 800.772.3370, or email ebarker@kvcc.edu.

Cancellations and late arrivals

Complete cancellation procedures and policies are detailed on our website and in your confirmation packet. Some late cancellation fees may apply.

Chaperones

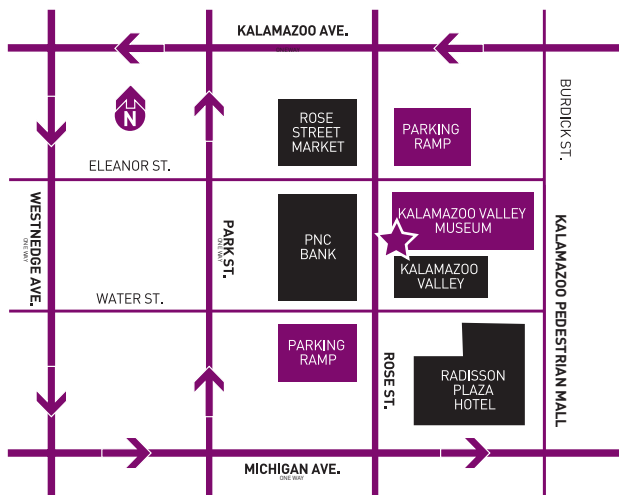

Challenger missions require one CLC-trained teacher per group. All other groups must bring one adult per six students. For fee-based programs, extra chaperones will be admitted to programs, space permitting, with regular fees charged per adult.

Location

The Kalamazoo Valley Museum is located at 230 North Rose Street, between Water and Eleanor Streets in downtown Kalamazoo.

Parking

Before your visit, make arrangements for buses with Central City Parking at 269.342.6383. Further information and directions to the Museum will be sent with your confirmation.

GENERAL INFO

Arranging a Visit to the Kalamazoo Valley Museum

Detailed information about all programs is available online at kalamazoomuseum.org, or feel free to call and ask to speak to one of our educators about matching our programs and exhibits to your curriculum needs.

Free General Admission

Planetarium, Challenger Experience & Workshops: \$3/student, minimum charge \$45
Challenger Learning Center Full-Crew Missions: \$5/student

Accessibility Services:

The Museum is handicapped accessible. Sign language interpreters may be scheduled for programs with a minimum of two weeks' notice. An assisted listening device is available in the planetarium.

Do Good, Have Fun!

Call 269.373.7955 to learn about the benefits of volunteering at the Kalamazoo Valley Museum.
